1. go to chaldal_task,
2. then go to main app menu,
3. than go to settings.py, configure database like this

DATABASES = {

'default': {

'ENGINE': 'django.db.backends.mysql',

'NAME': 'menu',

'USER': 'user',

'PASSWORD': 'password',

'HOST': '127.0.0.1',

'PORT': '3306',

'OPTIONS': {

'sql_mode': 'traditional',

'autocommit': True,

}

}

}

4. create database menu in mysql
5. import sql file in menu database which given at this folder
6. configure python3, django and mysql, mysqlclient
7.  run this command:
        python3 manage.py runserver
